

Ted Carr's Ultimate Wealth Manifestation Guide

By Ted Carr

Preface

I made my first million by age 30, and my next million by 32, and if you truly understand everything I'm about to tell you...

And you apply the principles as quickly as you learn them...

You'll make as much money online as you feel like within the next 30-90 days, without much effort - guaranteed.

Quick Back Story

In 2009 I was your average 19 year old Joe Blow brokie working a 9-5 job.

I even posted on Facebook complaining about my job on New Year's Eve.

I had zero clue what I was going to do for a career, and the stress was eating away at me to find out.

Then in 2010 I learned about **the Law of Attraction** thanks to a YouTube video.

Inspired by the video, I wrote an “unrealistic” list of what I wanted (make money online, live in the tropics, have a beautiful girlfriend).

I remember feeling dumb while writing it, and thinking “this will never happen!” and “I can’t let anyone find this list!”.

But in 2011, I was so desperate for a change that I made a new year's resolution to put this Law of Attraction to the test.

I started by creating a vision board of my ideal life & then wrote out my [life vision script](#).

It was not long before I began traveling to the tropics using money I didn't even have... thanks to my credit cards!

Boom, I was already ticking things off my list.

But I still had no clue how to make money online.

Regardless, I held the vision, and held the feeling of the dream already accomplished...

And in 2015 I posted this:

People started asking me how I was affording my travels, and so I started teaching people how to create & sell digital info products like I was doing with my courses, coaching, ebooks and memberships.

I've since gone on to make over \$3,000,000 teaching my methods to contentpreneurs.

But despite telling people about my manifestation process in my courses, I've never dedicated an entire book to deep diving into it.

So let us begin the deep dive into this wealth manifestation guide, AKA:
“the easiest process for making money online.”

Chapter 1: Confidence, Certainty, & Abundance

When you understand the primary principle in this book, making money online becomes as simple as blinking twice.

Can you blink twice?

Good.

Then do it.

If you were able to do that, you can make a lot of money just as easily.

But you must act quickly on everything I say because with a lack of speed you give off a vibe of hesitancy and uncertainty, whereas with speed you give off a vibe of confidence & certainty...

And with confidence & certainty (even if it feels false at first) comes abundance.

When you feel confident, certain and abundant, money just has a way of flowing to you.

First question you need to be able to answer: How much money per month do you want to make?

Write this amount down on paper.

Second question: How does seeing that amount feel?

Chapter 2 - “My energy shifted”

When you feel unworthy, unconfident, uncertain & desperate, you repel money.

How do I know?

Because I used to feel these emotions and I used to repel money as a result.

I would always struggle and struggle and struggle to make things work online, no matter how hard I worked.

I tried and tried and tried and put in so much effort but no matter what, nobody wanted to buy my stuff.

But when I addressed my emotions (ie. THE ROOT CAUSE of my success & failure) everything began to flow effortlessly.

Same with my clients.

Many of them would struggle and struggle to make sales despite working hard, but when we got to the root cause of their issues (their emotions), people started buying from them and things started working for them.

I'd ask them “What changed?” while expecting them to say something about their business strategy, tactics or offer.

But they'd always reply with statements like: "My energy shifted."

So how do you shift your energy?

Chapter 3 - Money Loves Speed

Shifting your energy requires speed.

I used to struggle and struggle and struggle to make things work online, even after learning about this universal law...

Why? Because I didn't act quickly on the advice I was given.

I sat around talking about what I wanted to do instead of actually taking the advice by applying it.

I wasted YEARS.

But when I did act quickly and adjust my emotions, money came right away.

I've now made over 3 million dollars online, and it was as easy as blinking twice.

So that's rule 1: Act quickly.

Money loves speed.

The faster you act on this, the faster you'll make money, and the more of it you'll make because you'll have momentum.

Quit talking about what you want to do, and what your plans are, and just act in the way I tell you to act in future chapters.

If you act in the specific way that I'll teach you, you'll make as much money as you feel like making.

Now look: You don't have to believe me.

And I did not create this manifestation method myself.

I've studied many teachers, gurus, masters, books, lessons, and retreats to discover what I'm about to share with you today.

And now, I'm going to pull back the curtain and show you what very few, if any, business mentors are teaching their clients today.

The best way to see if I'm bullshitting or not is to try it yourself.

You can only know this works from first-hand experience.

Chapter 4 - Making Sense of Conflicting Information

When it comes to making money online there couldn't be more conflicting information out there.

Some people will tell you to only sell coaching while others say you should only sell courses.

Some gurus say you should do drop shipping while others say you should do affiliate marketing.

Some coaches suggest selling low ticket ebooks while others say sell high ticket masterminds.

Some influencers say to use YouTube, others say use TikTok, and some say don't use social media at all.

And they all sound so convincing!

It seems that for every success in one direction with a certain process, you can find a success in another direction.

Why is that?

Because *every process* can work.

Every process anyone has ever used to make money online, you can use, too.

“Can” being the key word here.

“Can” does not mean “WILL work for you”.

“Can” means “MAY work for you.”

So... How do you determine which process can or can't work for YOU?

How do you determine which process is *the easiest* for you right now to make money online?

Who should you listen to?

Should you sell masterminds, coaching, courses, ebooks, freelancing, merchandise, onlyfans, or something else?

And should you use YouTube, Instagram, emails or Facebook to grow an audience?

And should you sell over the phone, via webinar, or a simple landing page?

That's what you're about to find out.

Chapter 5 - What to Focus on

The reason you can easily find thousands of people who make money online using a different process from one another is because the process for making money online is NOT the root cause of making money online.

Write that down.

The process for making money online is NOT the root cause of making money online.

You can take a successful person in any field and tell them they can't use that process anymore and within a few days they'd be back to making money with a completely new process.

Why is that?

Because ***the root cause of making money online is not the process!***

If the process WAS the root cause, you could take any dummy off the street, show them a process and they'd be rich.

But that NEVER works.

I've shown my process to thousands of people but only a small handful ever actually execute on it.

I've also worked with a lot of smart people who've paid me a lot of money for my 1 on 1 services where I create a custom process with them live in real time.

And even though we both know the process will work for them if they act on it, when I see them a week later, they've done nothing!

They broke rule #1. They did not act quickly.

And if they DID act, they either didn't stick to it or didn't do it with the right attitude.

Why is that?

Because the process for making money online is not the root cause of success.

It's merely a vehicle, of which there are many to choose from.

The process for making money online should NOT be what you look for... but it's what most people look for.

The process is actually a distraction.

The process is actually just a shiny object.

Most people who sell programs will sell you on the idea of implementing a process.

But they never once mention the true root cause of success...

And that's what you need.

To understand the root cause of your success, you need to understand systems.

Chapter 6 - Systems

Everything that happens in our world, happens inside of a system.

Think about it... We have a solar system, an ecosystem, a monetary system, a nervous system, a digestive system, etc.

When you understand systems, you can build your own and make a lot of money...

Systems are made up of 3 things:

1. Inputs
2. Process
3. Outputs

Write that down.

Inputs. Process. Outputs.

Another way to look at those 3:

1. Inputs = Root cause.
2. Process = Action.
3. Outputs = Results.

You're reading this because you want an output: Money.

And because the process/action comes right before the money, it's easy to get caught up in the process and lose sight of the root cause.

Most people make this mistake.

They don't look at what comes *before* the process.

Pop quiz for you: What comes before the process in a system?

Inputs!

And inputs that determine the process, right?

Right.

So if inputs determine the process, then the process can be completely ignored and it will still work.

Let's look at your digestive system for example.

When you eat food, do you really think much about the digestive process or do you just eat and enjoy yourself?

If you're like me, you just eat and enjoy yourself.

You KNOW there's a digestive process, but you don't do anything about it, you just naturally let it do its thing and assume it's going to work.

Say you drink sparkling water (input) and your belly starts gurgling (process) then you burp (output).

Or say you eat junk food (input) and your belly tries to digest it but it can't because you're not meant to eat junk food (process) so you experience bloating (output).

Or let's say you smoke some weed (input) and your body's THC receptors fire (process) and you get high (output).

Or let's say you eat a peach (input) and your body functions optimally (process) and you have perfect digestion and no symptoms and are full of energy (outputs).

When you look at it this way, you can see how clear it is that when you change the input, the process will take care of itself, and the output will be directly connected.

So you can see how you never have to fix your digestive system do you.

You just need to alter the input, ie. stop eating garbage, and start eating fruit!

Optimal inputs = optimal process = optimal output.

In a system, the inputs are all you need to focus on, as the process will take care of itself and will always determine the outcome.

Always always always no exceptions.

And if you try to change a process, but keep the inputs the same...

It'll be like looking into a mirror and trying to change the reflection of the mirror without changing yourself.

Never going to happen.

This is just how systems work...

Chapter 7 - F*ck the Process

Ok so by now hopefully you understand that: You do not determine the process yourself.

You leave that to nature.

You just control the input/root cause.

And when you control the root cause, the process will take care of itself.

So if inputs are so important, what are the inputs when it comes to making money online?

How you see and feel about yourself is the one and only input/root cause for making money online.

Write that down.

How you see and feel about yourself is the one and only root cause for making money online.

Commit it to memory.

When your friends and family ask how you got so rich, you can tell them: “I felt myself into it.”

To earn more money online, you need to adopt a new identity.

An identity of someone who makes the amount of money you want to make.

That is your input.

That is your only job.

If you want \$10,000/month, you must adopt the identity of someone who makes \$10,000/month.

I know it sounds crazy but if you're poor, or if you're not making as much money as you want right now, you either didn't know this or you haven't been properly applying it yet.

And as I heard my mentor Bob Proctor once say: "It's the ***application*** of wise thoughts that count!"

You can know this stuff intellectually, but until you sit down and actually apply it, it will do nothing for you.

I heard someone today tell me that their problem was their environment.

Lies.

Your environment is a symptom.

I heard someone the other day tell me that their problem was their spouse.

Lies.

Your spouse is a symptom.

Everything other than how you feel about yourself is a symptom.

The only true “problem” you’ll ever have is how you see and feel about yourself.

And the good news is, you are in control of how you see and feel about yourself.

Does it require conscious effort?

Yes, but as you improve your feelings, you improve everything - including your environment and bank balance.

Chapter 8 - A Direct Connection Between Feeling & Income

How you see and feel about yourself (AKA “your state of being”) is what will determine the amount of wealth you will receive.

Your mood, your vibe, your identity - it’s all the same thing.

How you see and feel about yourself at any given moment is the input into the system that is your life.

And better inputs = better outputs.

Good things happen when you feel good.

Great things happen when you feel great.

Wealth happens when you feel wealthy.

(And poverty happens when you feel broke or identify as a broke!)

So NEVER AGAIN say sh*t like: “Ugh I’m so broke.”

Replace it with: “I’m becoming more and more wealthy everyday!”

Stick with me here, and listen closely.

All you have to actually DO (and I mean ALL you have to do - because the rest is taken care of for you) is feel yourself as already making the amount of money you said you wanted to make.

Want to make \$10,000/month online?

Fine.

Then feel what \$10,000/month feels like.

Can you do that?

For me, \$10,000/month feels like poverty.

The idea of that gives me anxiety.

Whenever I feel like \$10,000/month though, I make it.

And it sucks.

Want to make \$100,000/month online?

Feel what \$100,000/month would feel like.

I made \$100,000/month a few months ago and I remember feeling like I was worth \$100,000/month.

There is a direct connection between how much money you're feeling like you're making and how much you're actually making.

So you have to ask the question, how does making X/month feel for YOU?

It may feel amazing. Bliss. Nirvana. Heaven on earth. Joy. Freedom.

Whatever feeling you get from imagining that amount, feel that as often as you can, everyday, multiple times a day.

You know what sadness feels like.

You know what anger feels like.

You know what excitement feels like.

What does \$20,000/month feel like?

Familiarize yourself with that feeling.

There is always a direct connection between how I feel and how much money I make per month as a contentpreneur - doesn't matter WHAT process I'm using.

Chapter 9 - Act

Right now, if I say blink twice, you can blink twice, right?

Right.

If I say act drunk, you could act drunk, too, right?

Try it now for a second.

Get loose.

If I say act happy, you could act happy. Try it now for a second.

Smile!

If I say act sad, you could act sad. Try it now for a second.

Pout.

If I say act rich, could you act rich?

If not, that's an issue.

You may not know how to act rich because you've never acted rich a day in your life.

Here's what can help:

Imagine a scene where you're having a conversation with a close friend or family member, and you're telling them how much money you make per month... and they react with a massive "oh wow! congratulations!"

How would you feel during this conversation?

Ok.

Good.

Now keep reimagining that scene every night before bed, & feeling that way everyday throughout the day.

But wait, you're going to forget this.

(Even the smartest humans forget what they read).

So write this down somewhere important and re-read this everyday so you remember it:

"How would I feel if I told someone I was making <your ideal amount>/month?"

This is the most important part of the book.

When you persist in feeling like someone who makes \$20,000/month everyday and you'll make \$20,000/month.

Guaranteed.

I used to go into the lake near my house and float on my bank.

As I floated, I'd feel what it'd feel like to make \$25,000/month.

And do you know how I felt?

Embarrassed!

I felt embarrassed to be making so much money (even though it was all in my head) while the rest of my family were making less than \$5,000/month working 40 hours/week.

But I held the feeling anyway, because it felt real and natural to me.

And I slowly turned the embarrassment into a feeling of pride.

And I started to wear that pride - DESPITE NOT EVEN MAKING THAT MONEY YET.

And the more I wore that pride, the faster the money came.

Next thing I knew, within a couple months, I was making \$25,000/month with my courses and coaching programs.

And it came so easily.

Chapter 10 - To Change the Outside, Change the Inside.

“Waste no time trying to change the outside; change the within or the impression; and the without or expression will take care of itself. When the truth of this statement dawns upon you, you will know that you have found the key to every door.” - Neville Goddard

Most people see and feel themselves to be as they *used* to be, so they stay the same - broke, fat, or depressed - and struggle to change despite hard work.

But if you look at all the people who’ve truly changed for the better...

You’ll see they had to change how they see themselves and how they feel about themselves.

Go and ask them.

They’ll even tell you so.

A poor man becomes rich by seeing himself as a rich man.

A fat man becomes a rich man by seeing himself as a fit man.

All action after changing an identity comes automatically.

All results come after changing an identity.

A lot of people will disagree with this, they’ll think it’s too hokey pokey.

Too “woo woo”.

But even people who are wealthy and disagree with this are just unconscious of the fact that they've done it.

People can be consciously competent, or they can be unconsciously competent - and any rich person who disagrees with the fact that it's their attitude about themselves which is the root cause of their success is just unconsciously competent with how they manage their self image.

Now because the root cause of your wealth online is how you feel about yourself, let's test where you're at right now...

How healthy is your bank account balance right now?

When I say the word "bank account", what feeling do you feel?

Anxiety? Fear? Stress? Did you swallow with guilt? Do you feel uneasy?

If you don't feel excited or happy or in love with the phrase "your bank account", you have inner work (input work) to do.

But don't worry - this inner work is not work at all.

It's fun, it's easy, it's play time.

Remember playing make belief as a kid?

You're going to do that again, and this time, you're going to play the rich character, and you're going to keep playing him/her.

And then ask yourself the question again, but this time answer with confidence, certainty and abundance.

How healthy is your bank account balance right now?

Keep asking that Q until you start associating the phrase: “Your bank account” with a positive feeling.

A feeling like: YEAH! My bank account is BALLIN!

“If you wish to find the secrets of the universe, think in terms of energy, frequency and vibration.” Nikola Tesla

Chapter 11 - All is Feeling

You may hear rich people say: “You have to work hard for wealth. Do hard things even if you don't feel like doing them.”

But the truth is, they DO feel like doing those things... or else they wouldn't do them.

You can't go pee unless you feel like it.

You can't lay down unless you feel like it.

You can't do anything unless you feel like it.

You may say you do not WANT to do those things, but you do feel like doing them, otherwise you wouldn't.

As I'm writing this, I may not be aware I feel like writing this, but I must be, or else I would not be.

You reading this right now may not be aware you feel like reading this, but you are, or else you would not be.

All is feeling.

You just may not be aware of your feeling.

Chapter 12 - Mind Power

They once did a study with basketball players. 3 groups.

1 group shot everyday.

1 group didn't shoot at all.

1 group shot in their mind's eye, feeling the shots.

After the "practice period," the group that shot in their minds eye and *felt the shots* performed just as well as the group who shot everyday.

They did another study with Olympic athletes and found that when the Olympians would visualize *and feel* themselves doing their sport, the same neuromuscular pathways fired as if they were actually doing the sport, meaning they were getting just as much practice as if they were doing the sport physically.

They did another study showing people who pretended they were back in the 1970's for a couple weeks reversed their aging biomarkers simply because *they felt* younger.

And in their before and after photos, everyone said they looked way younger in the after photos.

They did another study giving hotel cleaners heart rate monitors, and the cleaners lost more weight because *they felt* like they were burning more calories since they were measuring it.

They did another study giving placebo B12 to people, and their B12 levels went up because *they felt* like the pill was working.

They did another study where they gave poison ivy cream to people but told them it was baby lotion, and their skin didn't react to the poison ivy...

But then they gave actual baby lotion to another group and told them it was poison ivy, and they all broke out in rashes and hives because they *felt it*.

What do all of these studies have in common?

Even if the facts did not line up with their senses, these participants **FELT** changes occurring, and their feelings created a real change in their reality.

So the next time you hear someone say: "Go with your gut instinct because it's always right."

Just know, what they're really saying is: "Your gut feelings create reality."

Chapter 13 - Appreciation

If I tell you to feel sad right now, can you do it?

Yes you can.

Now what will happen is you'll start to notice things that make you sad.

So stop it.

Instead, feel grateful.

Say thank you.

And really feel it.

Don't think of gratitude, *feel it*.

Keep that feeling, because for as long as you feel it, you'll notice more and more things to be grateful for.

Whatever you appreciate, appreciates :)

So ask yourself now, what does feeling grateful for my bank account feel like?

Tune in and feel it right now at this very second.

Familiarize yourself with that feeling, because that feeling is the KEY.

As soon as you change the way you feel, the world reflects back to you what you're feeling - this is you bending reality.

"Everything is already created and your moods determine what portion of reality you experience." - Neville Goddard

Chapter 14 - The Record Store

A man walked into a record store and asked for a specific record.

The clerk looked around for a few minutes, but then said: "Sorry, we don't have that one."

So the man leaves.

And at first... he's upset.

But then he remembers he has the power to manifest.

He remembers he can bend reality to his wishes.

So rather than stay upset, he visualizes the store having the record.

He feels what it would feel like to play the record in his home.

The next day the man goes back to the record store and asks for the same record.

And before the clerk answers, in his mind's eye, the man hears the clerk say
“Oh yes it’s right here.”

But the clerk says, “Weren’t you here yesterday? I told you we don’t have
it... I’ll look again for you, though.”

So the clerk goes around the shop and looks again.

And then after looking around for awhile, the clerk says: “Maybe it’s up
here, hidden between these two records... I don’t know... oh yes, it’s right
here!”

Boom.

Making money online is the same way.

It doesn’t require effort.

It just requires you to assume the feeling of already making it.

It requires you to see & feel yourself NOW (like actually right now - as you
read these words) as the person who is already making the money you
wish to have.

Question: Does it HELP to have a ‘golden bridge’ that lets someone pay you
online, like a Paypal account or Stripe account?

The answer: Only if those things help you create the feeling of getting paid.

If you don't have a way to collect money yet online, you can get help with that inside my free community at contentpreneurship.com or you can Google search your way there.

Chapter 15 - A Sudden Paradox

If you want to make money online, see and feel yourself as already making the exact amount of money you want, NOW.

Enter the state of being that would be yours were you already in possession of the wealth you desire.

And when you do this **correctly**, a sudden paradox will occur.

Here's the paradox:

When you feel like you already have the money coming in, you will no longer want the money (because as far as you're concerned, you already have it, and nobody wants to get what they already have) and you will then be on the fastest track possible to getting it.

Plus, you won't feel annoyed or upset that "your manifesting isn't working" because again: you **truly & deeply** feel like you have already succeeded.

Experiencing this strange paradox lets you "let go" and lets you know you're on track, and your activities and circumstances will self regulate to perform the activities required to make that money.

When you alter your inner state, you alter your outer world with effort, and everything will happen for you without you needing to control any of it.

To grow a fruit, all you have to do is plant the seed.

That is your input.

That is all you need to do.

Nature takes care of the rest.

To earn money online, plant the seed by adopting a new identity.

That is your input.

That is all you need to do.

God/nature/the universe will (and always does) take care of the rest for you.

Chapter 16 - Glorify the Root Cause

Break down the word: “become” and what do you get?

Be & come.

Notice how the word “be” is before “come”?

You must “be” first, and then whatever you are being will “come”!

How about the word: “behave”?

Be & have.

Notice how the word “be” is before “have”?

To “have” it, you must first “be” it.

Behave like it is yours already.

It’s written in the English language in plain sight.

Now, I am not saying action is useless.

Action, oftentimes IS required.

(Sometimes action is not required though. People can just donate to you because they found an old YouTube video or someone may call you up and be like “Yo, your uncle died and put you in his will. You’re now worth an extra \$300,000.”)

But all action is a symptom of a feeling.

Action without a feeling of success is a futile never ending circular attempt at progress, like a dog with a tiny tail chasing its tail until exhaustion sets in.

Our society gives very little credit to the actual ROOT CAUSE of someone’s action, because we can’t see their feeling.

So we say, “Look! He put in all this hard work and focus and dedicated yadadada.”

So we glorify the process and the end outcome because that's what we can see externally with our senses.

But if we COULD see feelings, we would clearly see just how causal it is, and I'm sure we would glorify and give credit to feelings more.

Chapter 17 - The Easiest Sales Process

I could tell you the easiest "sales process" that I've ever seen that has worked for me and my clients, but:

A) You probably won't follow the process at all unless you change your self image.

And

B) It probably won't work for you unless you change your self image.

When you change your self image to that of someone who is already making money (even if you don't know how yet, and even if all your external world tells you it's a lie) the easiest process for making money will reveal itself to you.

It *may* look like:

- Social Media —> Freebie —> Email list —> Phone call
- YT Ad —> Webinar —> Phone Call

- Joint Venture Collaboration Agreement —> Live or Recorded Workshop
—> Checkout page

Or it may be as simple as brands reaching out to you and paying you for sponsorship plugs.

Or it may be that you help people feel happier with your quantum particle healing device from a remote viewing station in Idaho, I don't know - it doesn't matter!

There are 100's of different things you could sell, and 100's of different ways of selling it - but none of them should be of your concern.

What matters is your input.

That is YOUR ONLY JOB.

Get into the vibe, and watch the process unfold before you.

Go about this as you would when growing a plant.

You plant the seed (input), you watch it sprout (process), you see it blossom (outcome).

You don't stress over it.

You plant it, and you move on.

You remain neutral.

You consider it done.

Chapter 18 - Close Your Eyes

Normally I give clients a business plan to follow, but going forward, I'm going to just show examples of successful plans, then have my clients get into the state of mind of already being successful, and then work on their plan based on that vibe.

Because the truth is, like I said at the start, "For every success in one direction, you see a success in another direction."

Getting you to follow a specific process for making money online, other than getting you to feel like you're rich already, is pointless.

Because the process will reveal itself to you, and take care of itself once you assume the state.

Remember I said this would be as easy as blinking twice?

Let's test that right now:

In a moment, after you read this sentence, you're going to close your eyes and in your mind's eye you're going to see your hand holding your phone, and opening up your bank account app and seeing \$100,000 in there, and feeling what that would feel like.

Then say, in your head, but with feeling, something like: "Wow, I'm actually rich! \$100,000 looks good in there!"

OK, go on, close your eyes now and see & feel the scene in first person - not 3rd person.

Chapter 19 - 4 Steps to Manifest

Below are the only 4 steps you need to follow to effortlessly manifest wealth:

1. Write down what you want. (even if unrealistic)

How much money per month do you want?

What would you spend the money on?

Where would you live?

What kind of car would you drive?

What colour is the car?

I said I wanted to make \$25,000/month, drive a black Tesla, and live in a house I loved by a forest and lake.

2. Visualize it.

What scene can you see in your minds eye?

I saw myself driving a black Tesla with full tint and felt the steering wheel in my hands and comfy seats under my butt.

If you can close your eyes and visualize it, great.

If not, draw it out, or photoshop it, or find a photo of what you want using google images, and stare at it as if you're looking at something you own.

If you can see it, smell it, taste it, touch it in your mind's eye, you're on track.

In this case, you may want to see a vision of your monthly bank account statement or Paypal statement showing however much money you want to make per month on it.

3. Feel it.

This step is SUPER important and most people mess it up.

Re-read this step 10 times every day so you really get it.

Ask yourself: How would I feel if this vision was already here and now?

How would you feel in your heart?

What words would you use to describe the feeling?

For me the word was embarrassment.

I would say: "I'm a little embarrassed to be making so much money

since nobody in my family has ever been rich.”

And another word I had for the feeling was pride.

In my heart, I became proud to make over \$120,000/year.

But the point is, even if you DO NOT ALREADY HAVE what you want yet, you have to genuinely FEEL like you do.

It needs to be a physical feeling.

When you're legitimately feeling different, and vibing differently, you're on track.

You'll know you're properly feeling it when that paradox we spoke of in Chapter 17 occurs.

4. Persist in that feeling.

This is by far the hardest step for most people.

Most people screw this up within seconds.

But here's what you need to do: Take that feeling you just described, and as you go about your days, stay in that feeling.

Maintain the vibe.

This is critical.

The more intense and more consistent you can be with this new vibe, the faster you will manifest.

Persist in the new vibe until you're making what you set out to make, and then upgrade your vision and begin to persist once again in that new image once you reach your goal.

Act like a Hollywood actor would act when playing a role.

Or act like you would act when you used to play house, or dress up, or tea time, or whatever make belief games you used to play as a child.

Persist in playing the character who already has what you want, so much so that your wanting ceases to exist - because as far as you're concerned, you already have it.

If you ever lose that vibe, you will be off track and results will not show.

You must persist, even when your senses deny your desired outcome initially.

If you follow the first 3 steps, but then fail to manifest, it is because you did not master this 4th step of persisting in the desired state.

Persist and ye shall attract.

Don't just try this for a day or two and then go back to complaining

about your current circumstances...

Maintain this new vibe for as long as is necessary.

Surrender and sacrifice the OLD YOU for the new you.

People say: "You will accomplish whatever you set your mind to."

But this is not true.

You will accomplish whatever you set & KEEP your mind set to.

Think about it: If you set the thermostat to 22 degrees, you can't expect the room temperature to change to 22 if you change the thermostat back to 15.

You have to keep the thermostat set to 22 if you want the room temperature to become 22.

Same with your mindset.

You have to set it and then keep it set.

This is a daily practice.

Chapter 20 - How to Guarantee you Persist

If you want to stay consistent with persisting in your feeling of success, [join my free community here](#).

When you join, **you tell me how much money you want to make per month and we'll consider it done.**

Inside the community, work with you on your vision, and whatever means of making money you feel into, and we'll do it under the assumption that you're already successful, and are just looking for ways to modify/tweak/upgrade your already successful income stream.

See you in there.

Ted

P.S.

Here's one of my fav quotes from Neville Goddard:

"The question is often asked: What should be done between the assumption of the wish fulfilled and its realization.

The answer is nothing.

It's a delusion that, other than assuming the feeling of the wish fulfilled, you can do anything to aid the realization of your desire."

Bonus Chapter: The Law of Reversibility.

If $2 \times 3 = 6$, then 3×2 must also equal 6.

If friction creates heat, then heat creates friction.

If weight gain causes appetite increase, then appetite increase causes weight gain.

If being focused causes stillness, then stillness causes focus.

If a physical fact can produce a psychological state, then a psychological state can produce a physical fact.

If a lack of money makes you feel desperate, then feeling desperate will cause a lack of money.

If receiving money makes you feel abundant, then feeling abundant will make you receive money.

Or, as Neville Goddard puts it: “If your realized prayer produces in you a definite feeling or state of consciousness, then, inversely, that particular feeling or state of consciousness must produce your realized prayer.”
